- 59083 Electric Locomotive Vectron BR 193 Locomotion VI, 3 Rail AC, w 4 Panto

Picture shows actual size of the model

**Highlights of the Electric locomotive Vectron BR 193 in Locomotion colors:**

- detailed painting and lettering • die cast frame | separately attached handrails • new, highly detailed pantographs • detailed wheel faces • motor with two flywheels • 2 traction tires for more pulling power • PluX22 dcc decoder interface • prepared for speaker and sound module

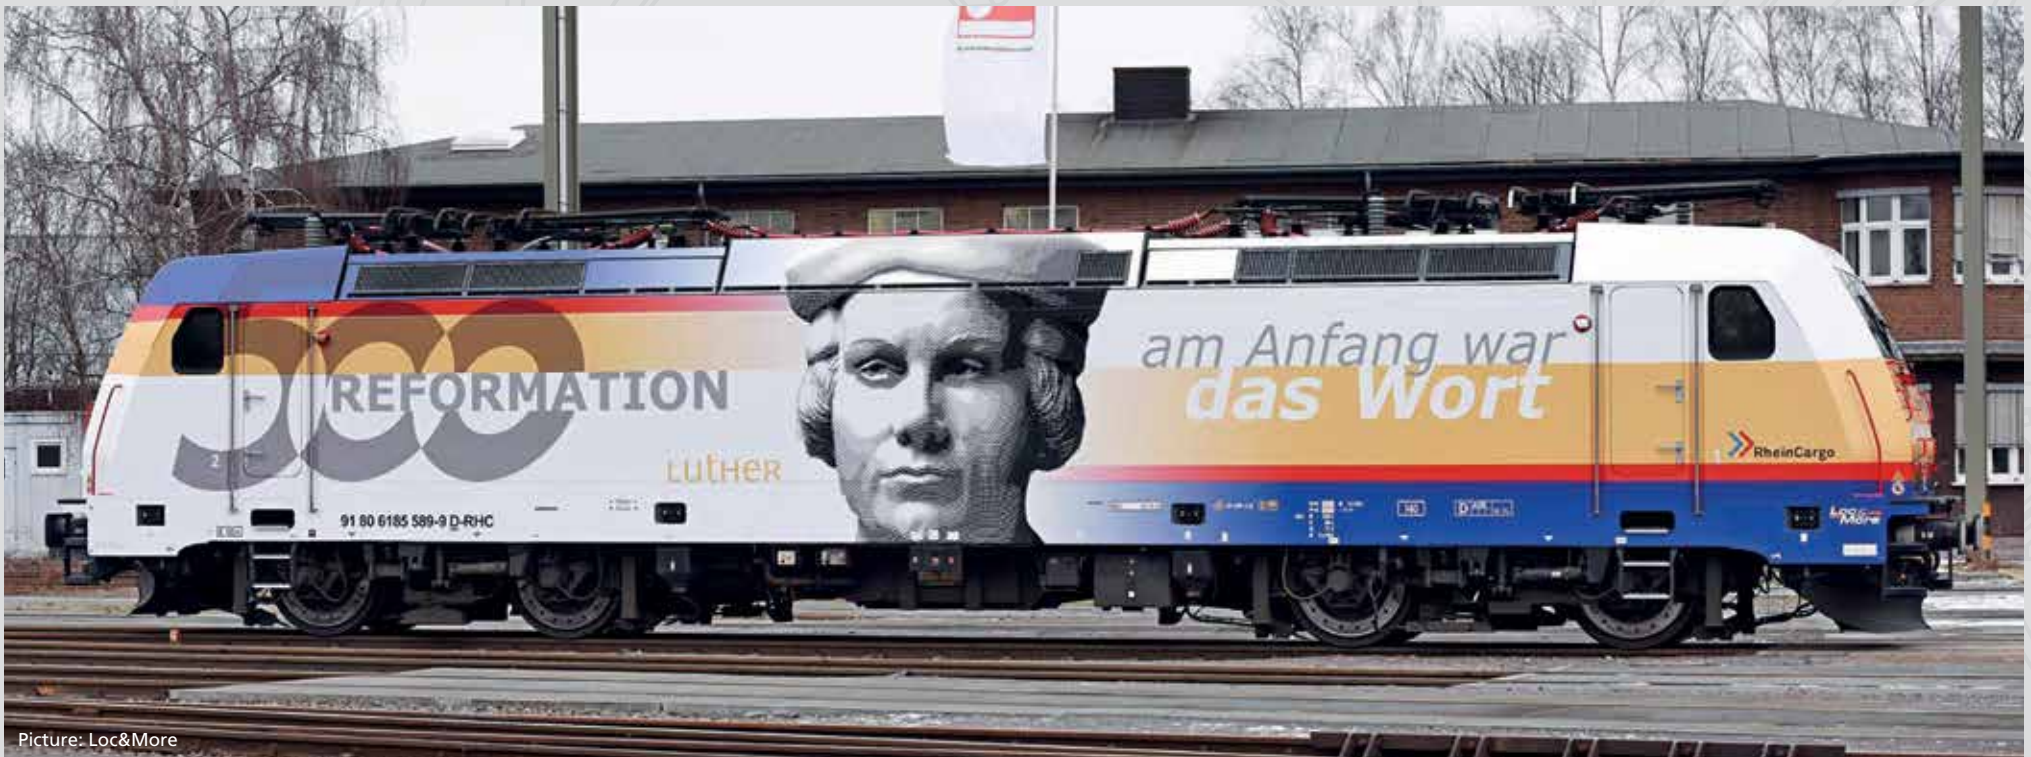

**suitable accessories for Vectron electric locomotive:**

- # 56344 PIKO Sound Decoder Kit (see main H0-catalog 2017 page 421) / # 56123 PIKO Loco Decoder, PluX22, Sound Interface (see main H0-catalog 2017 page 423)

**Electric locomotive BR 185.2 "500 Jahre Reformation" in Martin Luther RheinCargo colors:**

During the Luther-Year 2017 there are celebrations throughout Germany commemorating the publication of Martin Luther's 95 Theses in 1517. For this occasion, the logistics service provider RheinCargo and the Loc & More GmbH painted a BR 185 Traxx electric locomotive in an elaborate, attractive design that is paying tribute to 500 years of reformation. The color scheme features among other things a picture of Martin Luther and a Bible quote "In the beginning was the Word".

**2017 IS LUTHER-YEAR**

Picture: Loc&More

**59150 Electric Locomotive BR 185.2 Luther RheinCargo VI**

**59050 Electric Locomotive BR 185.2 Luther RheinCargo VI, 3 Rail AC**

**Highlights:** detailed painting and lettering • die cast frame • separately attached handrails • directional LED lighting white/red • motor with two flywheels • 2 traction tires for more pulling power • NEM 652 dcc decoder interface • prepared for speaker and sound module

**suitable accessories - sound module for BR 185.2:**

# 56193 PIKO Sound Kit - use w/decoder # 56121 (see main H0-catalog 2017 page 422) / The sound module must be directly connected to the # 56121 digital decoder.

In 2015 DB Long-Distance Service started operating new double deck trainsets under the brand name IC2. The trains consist of four double deck coaches, one double deck cab control car and a BR 146.5 electric locomotive in a matching color scheme. The new trainsets are mainly used for long distance trains on west-east lines and in northwest Germany. Current plans will have the new IC2 trainsets also operate in southwest Germany on the Karlsruhe-Stuttgart-Nuremberg and Stuttgart-Zurich lines starting with the timetable change in December 2017. The DB AG is planning to take delivery of a total of 120 double deck trainsets as part of the long distance train initiative 2030. The TRAXX2 electric locomotives are an evolution of the TRAXX series of locomotives. The most visible difference is a modified car body. It was modified to comply with the latest safety standards and its distinguishing features are the extended lower corners and the front hatch to access the air conditioning equipment.

59151 Electric Locomotive BR 146.5 IC DB AG VI  
59051  Electric Locomotive BR 146.5 IC DB AG VI, 3 Rail AC

**Highlights of the DB AG electric locomotive BR 146.5 in attractive Intercity livery:**

detailed painting and lettering • die cast frame • separately attached handrails • directional LED lighting white/red • motor with two flywheels • 2 traction tires for more pulling power • NEM 652 dcc decoder interface • prepared for speaker and sound module

**suitable accessories - sound module for BR 146.5:**

# 56193 PIKO Sound Kit - use w/decoder # 56121 (see main H0-catalog 2017 page 422) / The sound module must be directly connected to the # 56121 digital decoder.

MÁV-Trakció ordered the first Traxx P160 AC2 locomotives from Bombardier in 2010. The locomotives pull trains in Hungary and to Austria as well as Germany.

 **59152 Electric Locomotive BR 185.2 TRAXX**  
MÁV Trakció villnyomozdony VI

**suitable accessories - sound module for BR 185.2:**

# 56193 PIKO Sound Kit - use w/decoder # 56121 (see main H0-catalog 2017 page 422) /  
The sound module must be directly connected to the # 56121 digital decoder.

Since March 2011 select 1216.0 locos that are operating on the Brenner route show a large Italian flag and text that is advertising the ÖBB's Italy traffic internet presence on their sides.

 **96735 Electric Locomotive Rh 1216**  
ÖBB VI

**suitable accessories - sound module for Rh 1216:**

# 56196 PIKO Sound Kit - use w/decoder # 56121 (see main H0-catalog 2017 page 422) /  
The sound module must be directly connected to the # 56121 digital decoder.

### The DB classic in Italy

At the beginning of the 1980's the Italian railroads FSF (Ferrovie Suzzara-Ferrara) and FP (Ferrovie Padane) bought BR 220 locomotives that the DB had stored. The robust fan favorites kept their DB numbers while operating in Italy.

 **97731 Diesel Locomotive 220 045-9 ex DB, FP "Ferrovie Padane" VI**

**suitable accessories for Diesel Locomotive BR 220:**

# 56341 PIKO Sound Decoder Kit  
(see main H0-catalog 2017 page 421) /  
# 56123 PIKO Loco Decoder, PluX22,  
Sound Interface  
(see main H0-catalog 2017 page 423)

**Highlights:** detailed painting and lettering • die cast frame • separately attached handrails • prototypical trucks and wheels • engraved engine features visible through side windows • motor with two flywheels • 2 traction tires for more pulling power • PluX22 decoder interface • prepared for speaker and sound module

The BR 185 is an evolution of the BR 145 design. In total, more than 405 BR 185 locomotives were built. This makes it one of the most frequently encountered electric locomotives on the German rail network. The locomotives were primarily used to replace the DB BR 140. The PIKO BR 185 in DB Schenker Germany AG colors convinces with detailed painting and lettering as well as high tractive effort.

**PIKO BR 185 in the ubiquitous  
DB Schenker Germany AG colors!**

With the PIKO Hobby couchette cars a classic ÖBB night train can be authentically recreated. Just like in the real-world couchette cars in Rolf-Rüdiger design can be mixed with those in ultramarine color. With the Rh 1116 in the attractive ÖBB design PIKO offers a powerful locomotive for the night train.

**NON-POWERED TRAILERS TO GO WITH THE  
# 52723 RAILBUS, 3-RAIL AC VERSION**

See main H0-catalog 2017 for similar 2-Rail versions

With the newly released models of the legendary VT 98/VS 98 railcar of the Deutsche Bundesbahn PIKO offers another highlight packed train that is perfectly suited for running on model main and branch lines. It is the first volume production model of the railcar's early versions. The trailer and trailer/luggage van are equipped with short distance couplers with electric connectors. They don't require additional function decoders. All lighting functions can be controlled via a PluX22 decoder in the railcar.

59611 Railbus Trailer-Only 998 DB IV, 3 Rail AC

59613 Railbus Trailer-Only/Luggage Van 998 DB IV, 3 Rail AC

Graffiti has become commonplace in modern day railroading. Accordingly the PIKO set of three side dump gondolas has been intricately printed with authentic graffiti.

The two sides of each car are printed with different decorations.

58356 Set 3x 4-Bay Side Hopper Falns "On Rail / VTG" VI

# 56061

The n-Cars in the attractive blue-red-white color scheme are owned by the TRI Rental GmbH. The company provides consulting services to train operators and refurbishes passenger cars among other things. In the past some of these cars were used by NationalExpress. This has come to an end and they are now rented out to other railroads. Accordingly all National Express logos have been removed from the cars. Currently TRI logos are added to the cars as a permanent solution. In the future the cars will operate in various parts of Germany in this new design.

The PIKO locomotive model # 52520 / # 52521 (see main H0-catalog 2017 page 187) is compatible for the passenger cars.

 95332 Boxcar Hfhs brown/white FS IV; # 56060

Reefer car in the attractive livery of the Jever Brewery in East Frisia. The car carries epoch IV Deutsche Bundesbahn reporting marks.

54748 Reefer „Jever“ DB IV; # 56062

 40712 4-Bay Side Hopper Falns NS VI

**The model:**

The PIKO N-model of the Transwagon side dump gondola Falns precisely models form, color and lettering of the prototype registered in the Netherlands. It is equipped with reliable short distance couplers for unit train use and with every detail from the prototype. Grab rails, hand wheels, and the brake men's platforms are separately attached to reach a high level of detail.

For prototypical sound use the PIKO sound kit #36192 in conjunction with the PIKO loco decoder #36122.

38875 Christmas Car 2017 (only produced once)

37307 DB IV VT 798 Railbus, Jägermeister

37792 Cement Silo Car DR IV

**The sound-equipped steam locos on this page include:**

- Bright, Directional LED Lights and 5-Volt Smoke System
- High-Volume 3-Watt Digital Steam Sound System, with:

- ⇒ Synchronized Steam Exhaust Chuff
- ⇒ Correct Bell and Whistle Signals
- ⇒ Dynamo, Blower, Air Pump and Steam Release
- ⇒ Brake Squeal and Brake Release
- ⇒ Coal Shoveling (on coal-fired locos)

- Built-in 'dual-mode' decoder for full-feature operation on either Analog DC or Digital DCC

38246 Christmas Camelback 2017 with Sound and Smoke

**PIKO**  
SMARTCONTROL

For additional information see  
the current PIKO H0-catalog or  
[www.piko.de](http://www.piko.de).

**59114 PIKO PREMIUM  
Train Set Double Train with  
Sound**

Station announcements, lights, engine sounds, conductor whistle – modern model trains bring your layout to life with realistic effects. Controlling these functions has to be easy so that repeatedly checking the display does not detract from the model railroading fun. The PIKO SmartControl system is the perfect choice for the model railroader looking for a convenient state of the art digital control system. It is suitable for all scales from Z through H0 and it combines the advantages of a smartphone-based system with the specific requirements of a model train control system.

**PIKO SmartControl® System -  
brilliantly simple - simply brilliant!**

The Premium Train Sets include all the contents of the 55040 SmartControl Basic Set: PIKO SmartController, PIKO SmartBox, Safety-Approved Power Supply - Output: 16VDC @ 2.25A, USB power supply incl. cable as well as a PIKO lanyard and user manual.
